| PROJECT NAME | AI BASED DISCOURSE FOR BANKING INDUSTRY |

## CREATE CURRENT ACCOUNT

Now we create the action for current account queries.

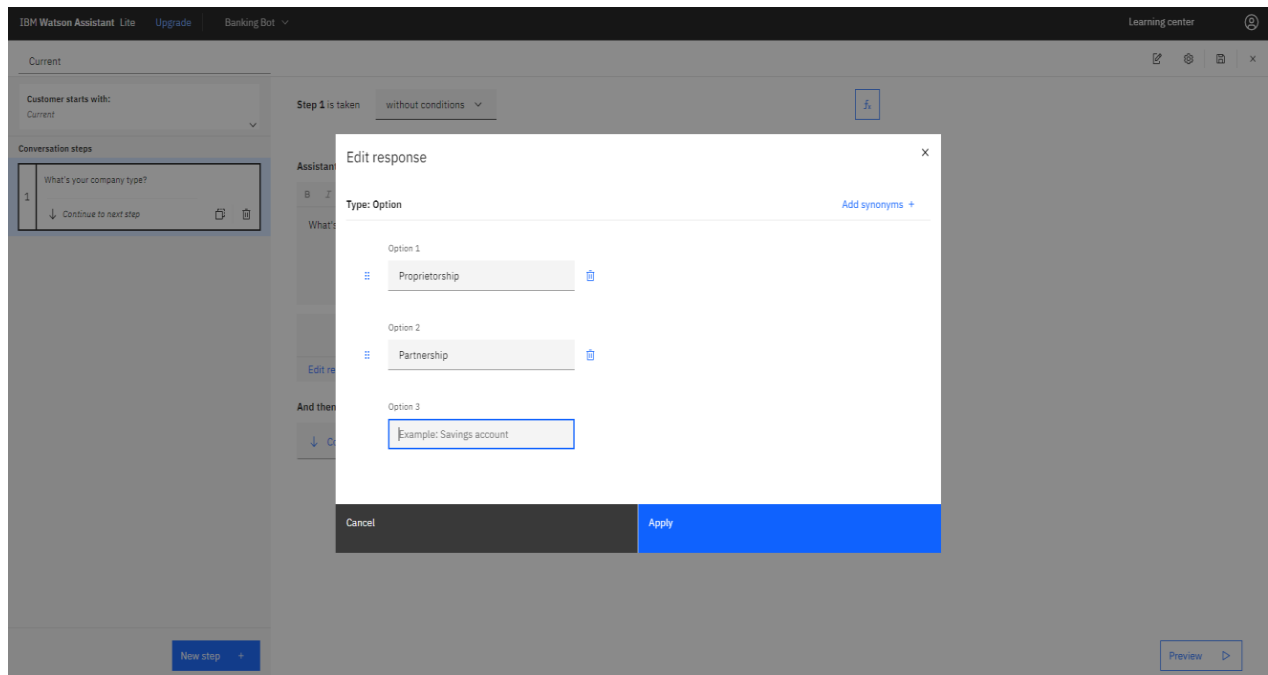

If a customer types current or current account he will be redirected to this current action

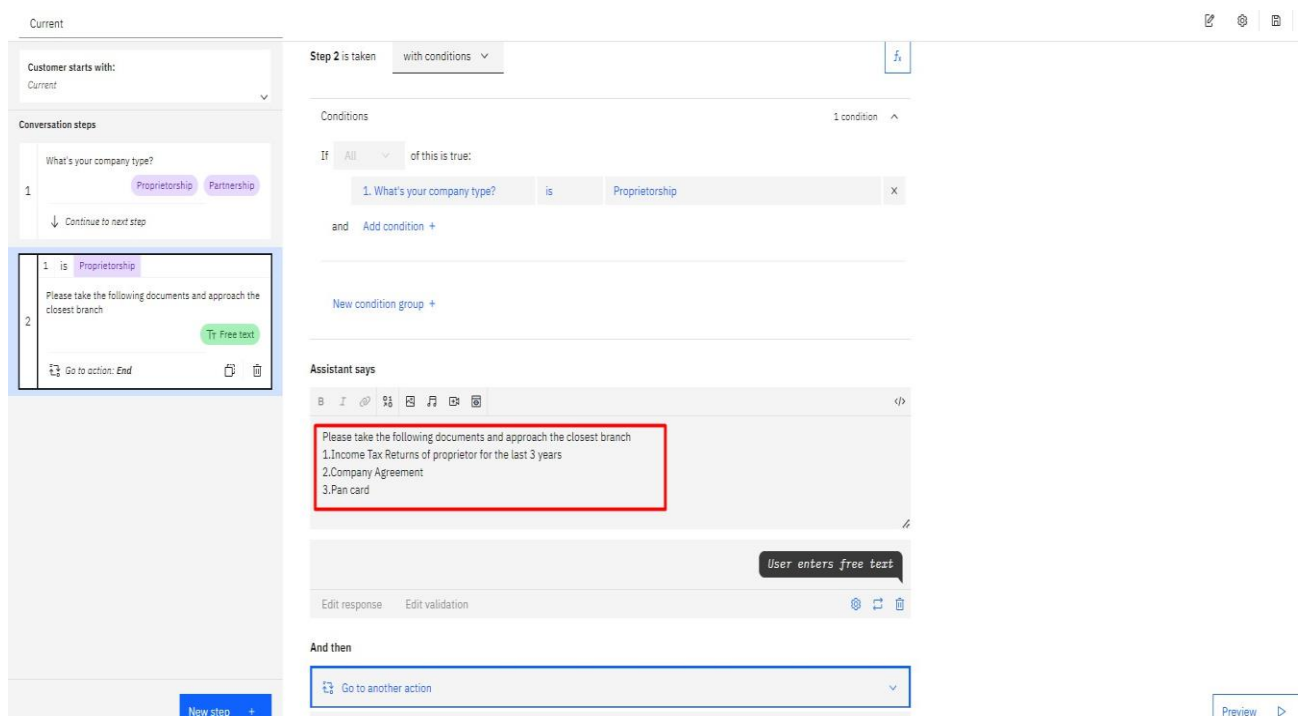

[Type here]

In customer response we add the company types as

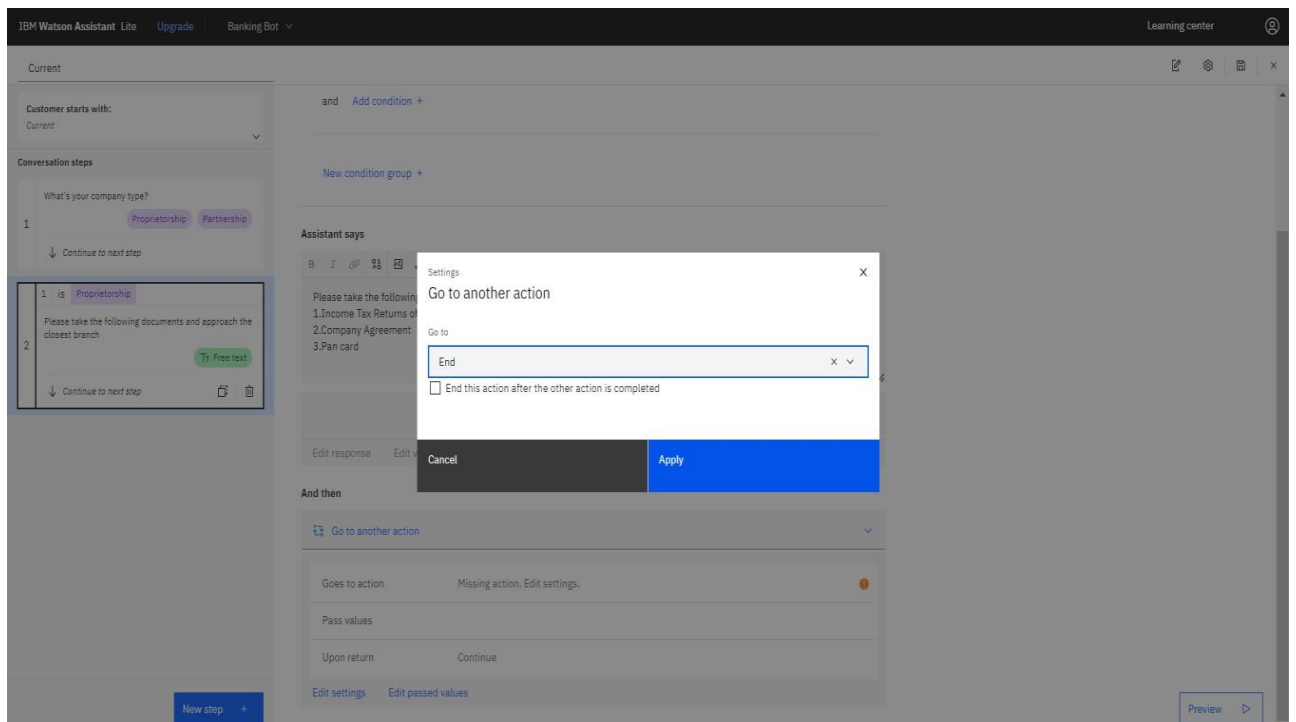

The user has two options to select the following images show the action done if user clicks onPropreitorship company.

The chat bots' response as follows:

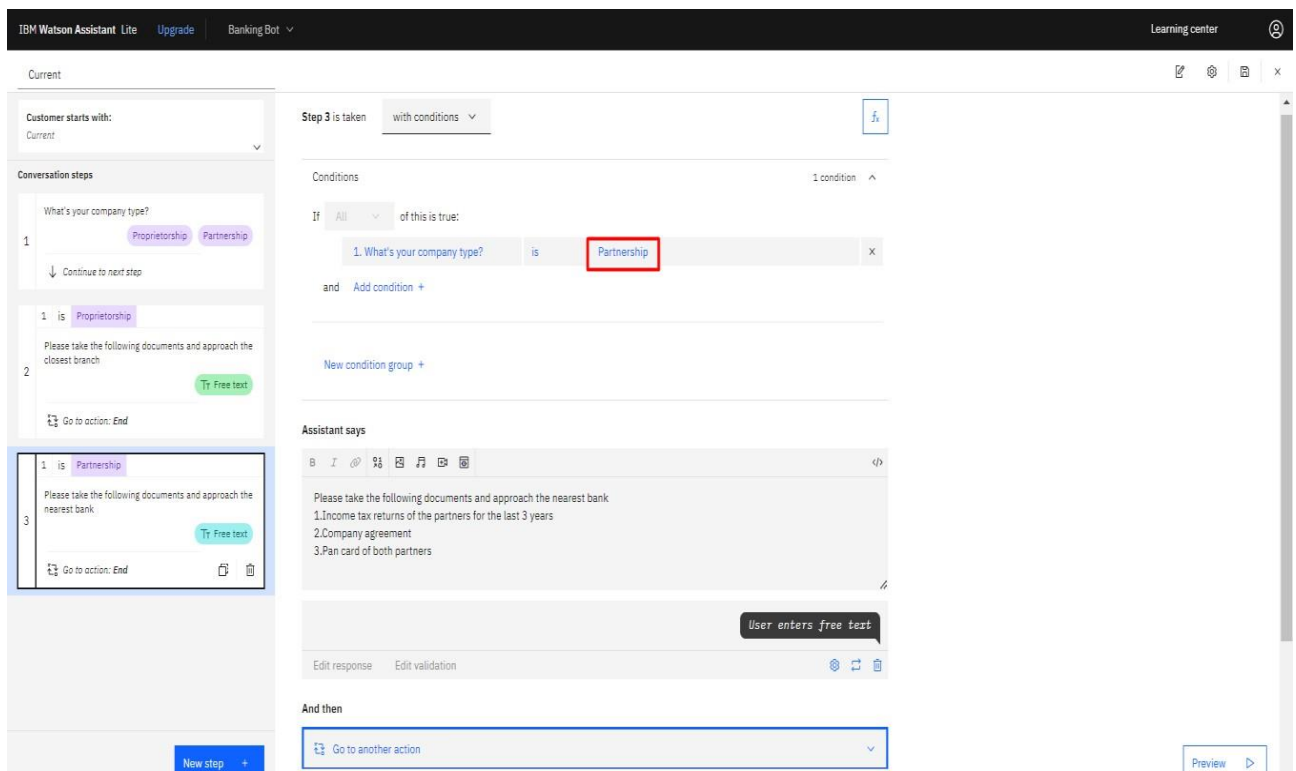

[Type here]

And according to users response we will redirect him to END

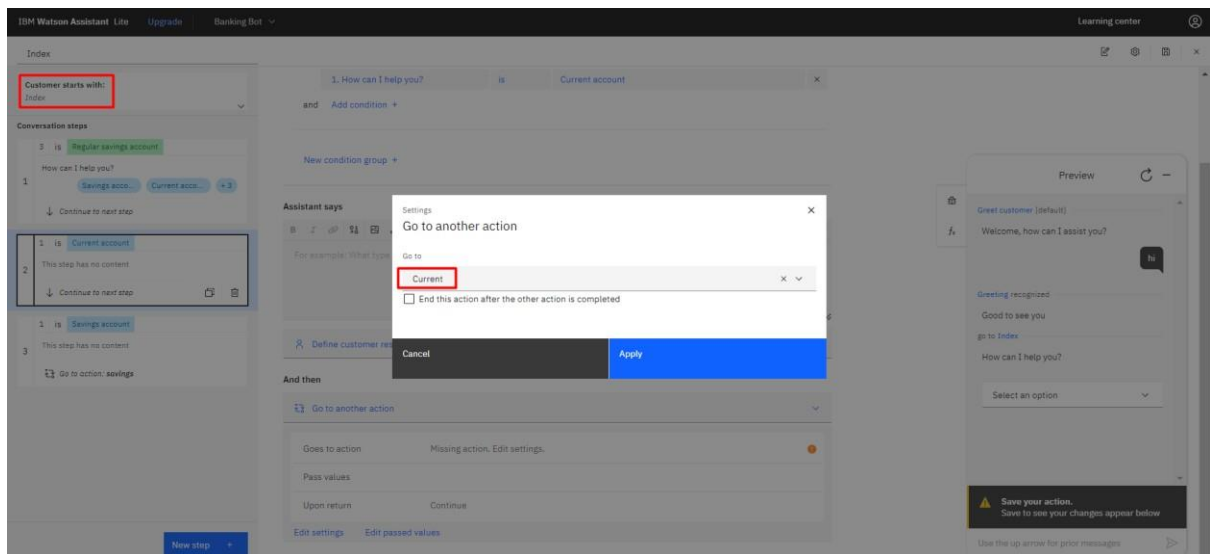

Now if the user clicks as partnership company we set the actions as follows similar to above action

[Type here]

Until now we have created the current account action, but we need to link this to index action.

Now the preview shows:
